The world's premier source of real-time, as-reported estimates and recommendations.

Financial professionals rely on the speed and quality of Thomson First Call Estimates to make decisions before their competitors and maximize performance.

Thomson Financial is the industry leader in providing real-time analyst forecasts and recommendations—no other global estimates provider can offer the same breadth and depth as Thomson Financial.

Why Thomson First Call Estimates?

- **Recognize opportunities ahead of the pack** – Thomson First Call Estimates offer investment managers access to sell-side estimates and recommendations in real-time. Over 10 measures – both detail and consensus for most items – allow an unparalleled view into the predicted performance of the world's largest firms.
- **Rate both the performance indicator as well as predicted price target** – Via price targets; investment managers will have access to key predictive information of a company's outlook. In addition, Thomson also provides recommendations based on a standardized 5-point system to draw unbiased comparisons across contributors.
- **Access to actual estimates – as they are reported** – Thomson First Call Estimates allow investment managers access to the EPS reported by firms. This critical information is delivered in real-time through a dedicated feed service which can be connected to a database or application for deeper analysis and comparisons.

Advantages of Thomson First Call Estimates:

- Eight unique measures including recommendations and price targets
- Real-time access to all measures as they are reported from the contributing source to the marketplace
- Actual from-the-source estimates
- Capability to database or deliver to an application for immediate incorporation into your trading strategy

Thomson First Call Estimates provide historic and current mean views. Thomson First Call Estimates are available via FactSet, one of our distribution partners.
