In today's competitive marketplace, private equity firms are under unprecedented pressure to structure deals and develop exit strategies that meet or exceed investor expectations. To achieve this goal, Thomson Financial provides private equity and venture capital professionals with rapid access to an array of corporate, market and deal information, together with the tools to analyze everything from investee companies and industry sectors to fund performance benchmarks.

### Coverage

- Robust profiles of more than 68,900 private equity-backed companies, including private equity investors, fund names and investment round details; over 12,900 private equity firm profiles; and information on over 26,300 funds are available.
- Approximately 50 data items are available for each record.
- Search venture and buyout-backed companies by industry, location, round size, round date, business descriptions, keywords and other criteria.
- Benchmark private equity fund performance against vintage year, asset class, and more.

### History Available

The private equity database includes over 30 years of history covering venture capital and private equity funds, firms, executives, portfolio companies and limited partners around the world.

### Trusted Sources

Primarily sourced from company websites, press releases, leading news sources, financial publications, and proprietary surveys of private equity and buyout firm financing activity through an exclusive partnership with the National Venture Capital Association (NVCA) in the U.S. and strong relationships with other global venture capital associations.

### Timeliness

- Investment, profile and fund raising information is updated on a daily basis.
- Benchmarks are updated on a quarterly basis in the U.S. and on a semi-annual basis in Europe.

### Value Add/Differentiators

- Textual profile data (including name, business descriptions, revenues, key executives, investors and major products)
- Company screening across public and private universes
- Coverage of private equity fund performance benchmarks
