

# DAILYDRUGNEWS.COM

DYNAMIC, RELEVANT DRUG NEWS AND EMAIL ALERTS POSTED EVERY BUSINESS DAY

## HOW YOU BENEFIT

- News is selected for importance and relevance
- More than 25 late-breaking news items posted every business day
- Practical and accurate information, including chemical structure images
- The latest advances from more than 300 congresses each year

## WHAT YOU CAN DO

- Receive daily headlines by email and link directly to news items of interest
- Read brief reports to qualify the relevance of the news items
- Search quickly on all sources
- Link directly to relevant content in *Prous Science Integrity*®

## RELIABLE INFORMATION TO SUPPORT CRUCIAL DRUG R&D DECISIONS

*DailyDrugNews.com* contains dynamic, relevant drug news and email alerts posted every business day, placed in context and presented clearly and concisely. The archive covers more than 80,000 news items published since 1996, with chemical structures where available.

You can search quickly on all sources, limiting your search to the period of time that suits you, by drug name, patent number, company, university, institute, therapeutic category or group, type of compound, information source, and full text.

*DailyDrugNews.com* includes:

- **News in Context:** brief reports prepared from extensive sources.
- **The Starting Line:** an alerting service presenting a table, updated weekly, of the most promising compounds entering preclinical development, lead compounds and new mechanisms of action.
- **Pipeline On The Move:** a weekly alerting service presenting changes detected in the status of drugs currently under active development.
- **Conference Highlights:** News from main congresses around the world.

Once you've located the item of interest, you can link directly to *Prous Science Integrity*® to explore the relevant products, companies, diseases, targets or patents. Links to *ILifeSciChannel*, the online gateway to health sciences, give you access to a rich source of scientific information, including webcasts, animations, advances in industry and academia, interviews from leading experts, therapeutic targets and a media resource center.

News is selected for importance, put into context and presented in a clear, concise and eye-catching format.
