

Westlaw Deep Research and Westlaw Citation Check Application Programming Interface (“API”) Product Specific Terms

- (a) **License.** Subject to the terms and conditions of the Agreement and these terms, we permit you, during the term specified in the applicable ordering document, to use, on a non-exclusive, non-transferable, revocable basis, the API for the purpose of submitting requests via API to Thomson Reuters generative AI features we make available to you via the API and receiving a response from those generative AI features via API (“API Response”), solely for the purposes and applications (i) explicitly listed on the ordering document, or (ii) otherwise approved in writing by Thomson Reuters (“Authorized Applications”). The full text of any materials that are cited to in the API Response must only be viewed or accessed exclusively through the web application provided by Thomson Reuters. You understand that access via an API may not provide the same functionality or experience as access via the web application. All Thomson Reuters APIs and API Responses are Property.
- (b) **Registration.** We will issue you with credential(s) that provide you with access and access management rights to the API. You must keep the credentials and all other log-in information secure and you must use the credentials as your sole means of accessing the API. You may not provide access to the API to any third-party without our prior written consent, and any third-party must agree to our license terms before access may be granted. You are responsible for all access to the API through your credential including any third party accessing the API on your behalf. If any unauthorized party accesses or may have accessed the API, you must notify us immediately, so we can delete the API credential and provide you a new one. We may provide access to the API through a Thomson Reuters designed portal (the “Developer Portal”), or by other means. You are responsible for managing individual users who can access the API. Your subcontractors are not permitted to access the API unless they agree with these developer terms (<https://apps.docuSign.com/webforms/us/bbe97d8446d823de2daa863dfbdacbfd>). When an individual with access to the API or the Developer Portal leaves your organization, or when your authorized third-party no longer needs access, you must ensure access is removed immediately. We reserve the right to periodically refresh credentials to protect the security of our systems, and will notify you of such updates.
- (c) **Authorized Applications.** You are solely responsible for the Authorized Applications and any integration of the API with the Authorized Applications.
- (d) **Use Restrictions.** You shall not use or permit a third party to use the Property for any purposes beyond the scope of the access granted in the Agreement. Without prejudice to the generality of the foregoing, and unless otherwise expressly permitted in the Agreement, you may not and you may not permit a third party to: (i) sell, license, sublicense, distribute, make available, publish, display, store, copy, modify, merge, adapt, decompile, decode or disassemble, reverse engineer, remove any proprietary notices, translate or transfer the Property in whole or in part, or as a component of any other product, service or material; (ii) use or provide the Property on a white-labelled/re-branded basis, or otherwise commercially exploit the Property in any manner; (iii) use the Property to integrate with, develop or improve products or services that compete with the Services; (iv) allow third parties to access, use or benefit from the Property in any way; or (v) use the Property (1) to develop, train, adapt, fine-tune, modify or improve any artificial intelligence software or other technologies, (2) to create any derivative works, adaptations, compilations or collective works in any manner or for any purpose that infringes, misappropriates, or otherwise violates any intellectual property right of Thomson Reuters, our third-party providers, or any other person, or (3) in a manner that violates any applicable law. You must not mine, scrape, index, or otherwise automatically access, collect, copy, download or record the Property. You will comply with any additional use restrictions that we provide to you through the Developer Portal.
- (e) **Modifications.** We may make available new enhancements, updates, upgrades, versions or releases of the API from time to time (collectively, “Changes”), and will use reasonable efforts to provide you with notice of such Changes. You acknowledge that you are responsible for maintaining compatibility and preserving the functionality of your integration with the API.
- (f) **Limitations.** We may from time to time set limits on the use of the API (e.g., limit the number of calls on the API or the number of searches or, rate between searches, etc. as applicable to the use of the relevant API). We reserve the right to throttle or suspend usage in our sole discretion if you exceed such limits. You must not access the API or related documentation in a manner that compromises, breaks or circumvents any of our technical processes or security measures associated with the API. You must not mine, scrape or aggregate the API Responses.
- (g) **Suspension.** We may suspend, disable or withdraw access to the API at any time if, in our reasonable opinion, you have breached any material term of the Agreement or if there is risk of any breach of security. We will not be responsible for any loss, damage, costs, expenses or other claims of yours or any user or any third party resulting from the suspension of access via the API.
- (h) **Disclaimer of Warranties.** We will not be liable for any inability to access the API, including any warranty that the API will be compatible with any of your or any third-party’s software, system or other service, including Authorized Applications. All API access is your responsibility and you acknowledge that the API is provided on an “AS IS” basis without warranties of any kind. If you do not adhere to the API documentation we provide to you, we cannot guarantee the API will function as intended or expected. We disclaim any liability of any kind arising from or relating to Authorized Applications.

(i) **Definitions.**

“Property” means our property, which includes but is not limited to our Services (which includes the APIs), information, Documentation, data (whether tangible or intangible), and Usage Information. Property also includes data, information and technologies supplied by our third-party providers and available through the Services.
