

2019 SUMMER ASSOCIATE PROGRAM (SAP)

BRING YOUR PASSION

SAP is a 10-week internship program and the direct pipeline for our full-time Management Associate Program (MAP). MAP helps to develop and grow high potential talent to become world-class leaders and managers in a rapidly evolving company.

This program has 2 distinct tracks:

- 1) Strategy - ideal for individuals looking to pursue a career executing strategy at 3 levels – corporate, product or proposition (business unit or corporate level) and business enablement/operations.
- 2) Finance - a track for individuals who see themselves as finance business leaders or future CFOs.

By taking part in this program you will gain exposure to Thomson Reuters senior management. The program also includes a team-based Summer Business Challenge in which you will work with a team of fellow SAPs to solve a high-priority business challenge. Teams will then present to senior leaders and sponsors. Through this enriched experience, you will benefit from learning and coaching, networking opportunities and peer mentorship.
