

Unite AI And Tech Across Business Enabling Functions To Enhance Agility

SUCCESSFUL ORGANIZATIONS LEAD WITH INTEGRATED TECHNOLOGY

We developed a model to assess how insights-driven organizations utilize technology across functions.

● High maturity

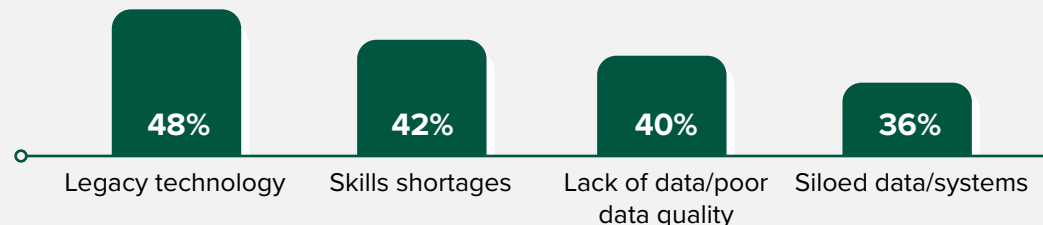

● Low maturity

MOST ORGANIZATIONS AREN'T THERE YET

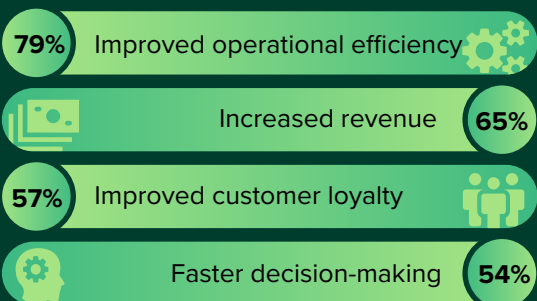

While **80%** say cross-department collaboration is key to meet strategic goals, **major challenges remain.**

Hurdles to achieving goals include:

OVERCOME HURDLES WITH CONNECTED SOLUTIONS FROM THE SAME VENDOR

Firms using integrated tech from one vendor overcome challenges and achieve strategic goals, such as:

UNITED SYSTEMS AND DATA MAKE AI-AUGMENTED WORKFLOWS POSSIBLE

AI-augmented workflows need secure, connected systems and data for accuracy and information security.

Value of AI capabilities for enabling functions include:

- ✓ **83%** Automatically generate risk and identity analysis
- ✓ **77%** Interpret and summarize data
- ✓ **68%** Query data across legal, risk, tax, and trade databases
- ✓ **66%** Automatically configure our organization's tax engine via natural language inputs
