\(^{(1)}\) Adjusted earnings and adjusted earnings per share (EPS) include dividends declared on preference shares but exclude the post-tax impacts of fair value adjustments, amortization of other identifiable intangible assets, other operating gains and losses, certain impairment charges, other finance costs or income, Thomson Reuters share of post-tax earnings or losses in equity method investments, discontinued operations and other items affecting comparability. Thomson Reuters calculates the post-tax amount of each item excluded from adjusted earnings based on the specific tax rules and tax rates associated with the nature and jurisdiction of each item. Adjusted earnings per share is calculated using diluted weighted-average shares and does not represent actual earnings or loss per share attributable to shareholders. Thomson Reuters uses adjusted earnings and adjusted EPS as they provide a more comparable basis to analyze earnings and they are also measures commonly used by shareholders to measure the company's performance.

\(^{(2)}\) The change in adjusted earnings per share before currency (at constant currency or excluding the effects of currency) is determined by converting the current and prior period’s local currency equivalent using the same exchange rates.
### Calculation of Return on Invested Capital (ROIC) (6) (Slide 19)

#### (millions of U.S. Dollars)

**Calculation of Return on Invested Capital (ROIC)**

- **Operating profit**
  - 2013: 1,318
  - 2014: 2,333
  - 2015: 1,526
  - 2016: 1,390

- **Adjusted operating profit - continuing operations**
  - 2013: 1,703
  - 2014: 1,876
  - 2015: 2,055
  - 2016: 1,930

- **Consolidated post-tax adjusted operating profit**
  - 2013: 1,709
  - 2014: 1,861
  - 2015: 2,088
  - 2016: 1,983

#### Notes:

1. **ROIC** is calculated as adjusted operating (loss) profit after tax expenses expressed as a percentage of the average invested capital during the period. Thomson Reuters uses a return on invested capital as it provides a measure of how efficiently the company allocates resources to profitable activities and is indicative of our ability to create value for our shareholders.

2. Adjusted operating profit includes operating (profit) losses from other businesses.

3. Excludes cash taxes paid on the disposal of businesses and investments.

4. Goodwill has not been reduced, in any period, by the accumulated impairments of $2.7 billion, $2.8 billions, $3.0 billion in 2016 and 2015, 2014, 2013, respectively. Goodwill excludes amounts associated with deferred taxes of $2.5 billion$2.8 billion, $2.6 billion, $2.7 billion, in 2016, 2015, 2014, and 2013, respectively, arising from acquisition accounting.

5. Represents present value of operating leases primarily for real property and equipment contracted in the ordinary course of business.

6. For the 2017 Estimate only, Thomson Reuters is unable to reconcile this non-IFRS measure to the most comparable IFRS measure because the company cannot predict, with reasonable certainty, the 2017 impact of changes in foreign exchange rates which impact (i) the translation of the company's results reported at average foreign currency rates for the year, (ii) fair value adjustments associated with foreign currency derivatives embedded in certain customer contracts and (iii) the translation of the balance sheet using the spot rate as of December 31, 2017. Additionally, the company cannot reasonably predict the occurrence or amount of other operating gains and losses, which generally arise from business transactions the company does not anticipate.
