What to expect from the data conversion

The overall objective of the GoSystem Tax data conversion is to produce accurate client data for the processing of 2023 tax returns. Data conversions are from the prior year (2022) to the current year (2023). Where applicable, 2022 amounts will generally appear as prior-year amounts in the 2023 return.

Note: 1040 returns are converted to returns of the same year. For example, 2022 returns will be converted to 2022 returns and then rolled to 2023.

We have made every effort to consistently and accurately convert the data listed in this document. However, due to inherent differences in the way UltraTax CS and GoSystem Tax store and display values, inconsistencies do exist in isolated instances. Also, if a field in GoSystem Tax is required and the corresponding field either did not exist or was blank in your UltraTax CS data, a period (".") will appear in the GoSystem Tax field. To ensure the data is accurate and complete, you should conduct a careful review of your converted data and make additions or modifications in GoSystem Tax as required.

Conversion notes and exceptions

The following section contains additional detail to assist in review of the information that has been converted.

Two-year comparison

The 2022 UltraTax CS federal two-year comparison amounts convert to prior-year amounts on the 2023 Organizer screens.

Schedule A

- Carryovers of Disallowed Investment Interest Expense convert like-kind descriptions to Investment Interest Expense in Itemized Deductions in the Organizer pane. You will need to enter carryover amounts in the Organizer > Itemized Deductions > Investment Interest Expense > Investment Int. Exp. > Other Information folder.
- Current-Year Contribution Carryovers will convert to Joint for married filing joint returns and will convert as Taxpayer for all other filing statuses. Prior-year amounts will convert as assigned in UltraTax CS.
- Non-cash items, regardless of amount, will convert to non-cash items less than \$500.

Schedule B

- Descriptions for UltraTax CS special interest codes **3** through **7** (used with Interest Income) will convert as regular Interest Income. Note, however, the description will not convert if a Savings / Loan Bank and other amount was not entered. For example, a payer name with only a U.S. Bonds and Obligations amount will not convert.
- Enter the information for intangibles as appropriate.

Estimates

Review prior-year estimated tax payments and overpayments applied.

K-1 activities

- Assets entered in the Depreciation and Amortization folders will not convert.
- For 1065 and 1120 IRS Schedules K-1, a partnership name and corporation name must be entered. Otherwise, the activity will convert with a period (".") as a description name.
- Descriptions of "Other income" and "Other deductions" items do not convert.

Depreciation

- Assets subject to a business use percentage in UltraTax CS will convert at 100 percent (i.e., accumulated depreciation will convert at 100 percent).
- Section 179 carryovers do not convert.
- The method MACRS 150%, when the Indian property designation is present, could not be converted. Additional data entry will be required.
- The Mid-Quarter designation could not be converted. Additional data entry will be required.
- We do not convert ITC codes.
- We do not convert tax preference code "P" for amortization of certified pollution control facilities.
- Review the AMT accumulated depreciation associated with assets on rental real estate activities where depreciation expense was allocated to others.
- State-specific depreciation amounts do not convert.

Schedule E

Vacation Home and/or Personal Property data entry in UltraTax CS automatically creates a Rental Property in GoSystem Tax. Vacation Homes and Personal Properties are not converted to the like-kind activities in GoSystem Tax.
