GLOBAL PRODUCT GROUP

As part of our ongoing development of the Global Product Group (GPG), we created 14 new commodities covering the category of food.

In addition, our GPG products will be supported with Product Category Attributes (PCA). PCAs allow clients to use an alternative commodity code reference to activate global content. GPG products may be referred to by clients either by a mapped Product Code (configured as a Standard Mapping), through a direct reference to that GPG product's commodity code, or by using the PCA commodity code. At this time, PCAs are being added only for GPG products that are directly related to an existing US Commodity Code. These PCAs will be displayed on GPG products as UNSPSC attributes.

Future releases will continue to expand our global offering by adding additional content. Please watch for release notes throughout 2026 and beyond.

AUTHORITY UPDATES

Canada

We supplemented the content with taxability for food and electrical appliances across multiple Canadian authorities, effective August 1, 2026.

As GPG continues to evolve, this content is still being developed and will be expanded in upcoming releases, including additional coverage for beverages, medical supplies, oils, and hazardous products.

Mexico

We introduced taxability coverage for beverages across Mexican authorities, effective August 1, 2026.

As GPG continues to evolve, this content is still being developed and will be expanded in upcoming releases, including additional coverage for beverages, medical supplies, oils, and hazardous products.

United States

The Global Product Group is now live and available for use in all US jurisdictions. As part of our standard content review and update process, we will continue to evaluate and enhance this coverage in accordance with evolving regulatory requirements. For details on these updates, please refer to the Global Change Report.
