GLOBAL PRODUCT GROUP

As part of our ongoing development of the Global Product Group (GPG), we created 20 new commodities covering the category of food.

In addition, our GPG products will be supported with Product Category Attributes (PCA). PCAs allow clients to use an alternative commodity code reference to activate global content. GPG products may be referred to by clients either by a mapped Product Code (configured as a Standard Mapping), through a direct reference to that GPG product's commodity code, or by using the PCA commodity code. At this time, PCAs are being added only for GPG products that are directly related to an existing US Commodity Code. These PCAs will be displayed on GPG products as UNSPSC attributes.

Future releases will continue to expand our global offering by adding additional content. Please watch for release notes throughout 2026 and beyond.

Canada and Mexico

We introduced taxability coverage for food and supplements product categories across Canadian and Mexican authorities, effective 01 August 2026.

As GPG continues to evolve, this content is still being developed and will be expanded in upcoming releases, including additional coverage for beverages, medical supplies, oils, and hazardous products.

United States

The Global Product Group is now live and available for use in all US jurisdictions. As part of our standard content review and update process, we will continue to evaluate and enhance this coverage in accordance with evolving regulatory requirements. For details on these updates, please refer to the Global Change Report.

NOTIFICATIONS

Enhancements to Standard Exempt Reasons

There are ongoing enhancements to Standard Content to update the Standard Exempt Reason on existing exempt taxability rules. These changes should have no impact on tax calculations but will facilitate better harmonization between the ONESOURCE Indirect Tax Determination and ONESOURCE Sales & Use Tax Compliance products. Additional updates will be made throughout 2026 to standardize all existing exempt taxability rules with the applicable Standard Exempt Reason.

Destination Tax Seller License

In August Content Update #1, Operating License Type Mapping (OLTM) has been added to support Destination Tax collection requirements for certain motor fuel tax authorities, effective 01 October 2026. At this time, customers **should NOT leverage DSL data** prior to 01 October 2026, as this will interfere with current OLTM operations and may generate erroneous results.

Policy Update

To increase our transparency to customers regarding tax content released with short notice or at unplanned times, process improvements are being made. The following are the upcoming changes:

Please note, content notices will be sent to all customers for changes of significant impact.

There were 2 new historical rates (example: XXCU/XXSU/XXST) added as part of the August Content Update #1:

- MO - VERONA, CITY SALES TAX
- WA - FEDERAL WAY, CITY SALES/USE TAX

Content Licensing

Content has been added to support the Oil and Gas upstream, midstream, and downstream process chains, and the Voice over Internet Protocol (VoIP) industry. Please refer to the change report for details on what has been added in this content update. If you wish to utilize any of this additional content for tax determination purposes, you can reach out to your Account Manager to inquire about licensing.

Oil and Gas

New content has been added to further enhance and better serve our customers in the oil and gas industry. As part of this expansion, several new products and taxabilities are being rolled out to customers in our monthly content updates. The ONESOURCE Indirect Tax Product Taxability Matrix will be populated with the individual product and state jurisdiction taxabilities as they are completed.
