

ONESOURCE Indirect Tax

International Content July Update

Issue Date: 24 June 2026

Update No: 1

ABOUT THIS UPDATE

The July Content Update #1 for ONESOURCE Indirect Tax Determination contains updates to International Content. Details related to these updates are included in the July Content Update #1 Change Report. This Change Report contains all changes to Standard Content included in the 2026.7.1.G/G and 2026.7.1.G/G.2 files. Versions 5.5.0.0 and above are supported by this update.

Important Note Regarding Content Update Versions

In Determination 5.7.0.0, Thomson Reuters added tables and columns to the tax content database in support of Compliance and Allocated Charge functionality. Tax content data created for these features is not available in Determination versions 5.7.0.3 and prior. Thomson Reuters has therefore made the decision to produce two versions of tax content. The Content Update version that you download and import into your system depends on your currently installed version of Determination.

If you are running Determination 5.7.0.3 or prior, you must use Compatibility Version G tax content.

If you are running Determination 5.8.0.0 or later, you must use Compatibility Version G.2 tax content.

For more information about accessing and installing the correct content, see **Applying the Content Update** at the end of this letter.

Municipal Level

We created the municipal authority structures to support the planned 689 municipalities under Brazil IBS-City, Brazil ISS, and Brazil ISS-WHT. The associated rules are being delivered progressively and will continue to be made available in upcoming 2026 releases.

Canada

De Minimis

We created new authorities, rates, and rules to support De Minimis tax treatment for import transactions originating in the United States. These changes are available exclusively in Determination Enterprise and Determination Anywhere.

Quebec

We introduced a 0% Quebec Sales Tax (QST) rate for certain food and hygiene products, including ready-to-eat desserts, baked goods, prepared fruit and vegetable products, snack mixtures, toilet paper, and facial tissues, effective July 15, 2026.

Manitoba

We introduced Retail Sales Tax (RST) exemptions for certain food and beverage products, including ready-to-eat prepared foods, carbonated beverages, low-juice beverages, baked goods, and snack foods, effective July 1, 2026.

In addition, we updated Tire Recycling Fees in accordance with the revised schedule published by Tire Stewardship Manitoba on March 31, 2026. Effective July 1, 2026, the

fee for passenger and light truck tires will increase from CAD 4.00 to CAD 5.00, while the fee for large off-the-road tires will increase from CAD 135.00 to CAD 140.00.

Oil & Gas

Following Bill C-30 adopted on June 18, 2026, we introduced a temporary suspension of the federal excise tax to CAD 0.00 per liter on aviation gasoline, aviation fuel, diesel, and gasoline, effective from April 20 to September 7, 2026.

European Union

We introduced new contributing authorities under the existing EU Member State authorities to support the fixed EUR 3.00 customs duty on qualifying low-value goods imported into the European Union. The duty is established by Council Regulation (EU) 2026/382 of 11 February 2026 and applies from July 1, 2026. It generally applies to qualifying B2C consignments with a value not exceeding EUR 150.00.

In ONESOURCE Indirect Tax Determination, the new contributing authorities apply the EUR 3.00 customs duty when the Low Value Goods transaction type is selected, and the transaction satisfies the applicable shipment, registration, and value conditions. Where applicable, the customs duty is included in the taxable base for VAT calculations.

To support this treatment, we updated the Calculation Method parameter for existing rules under the EU Member State authorities from **Tax on Gross Amount** to **Tax on Gross and Contributing Authorities**. This ensures that tax is calculated on both the gross amount and any amount calculated by applicable contributing authorities.

For additional configuration details, applicability rules, and test scenarios, please refer to the accompanying guide.

Mexico

We created a new authority, rates, and rules to support De Minimis tax treatment for import transactions originating in the United States. These changes are available exclusively in Determination Enterprise and Determination Anywhere.

Papua New Guinea

We extended the zero GST rate for certain basic household products until December 31, 2026, based on the Goods and Services Tax (2026 Budget) (Amendment) Act 2025.

Puerto Rico

We created Sales and Use Tax exemption rules for school products related to the Back-to-School tax holiday, effective from July 17 to July 18, 2026, and from January 8 to January 9, 2027.

Rwanda

We updated the logic group settings to comply with new VAT rules for electronic services under Ministerial Order No. 004/26/10/TC, published on April 29, 2026. These changes take effect on July 29, 2026.

As part of this update, we introduced the Electronic_Services authority logic group. Transactions classified under the Electronic Services transaction type are subject to the standard VAT rate of 18%.

United Arab Emirates

We changed the value of the "Turn Off Authority" authority option in the UAE VAT authority from "Yes" to "No", effective July 1, 2026. Customers who need to trigger VAT for transactions in the United Emirates should use the UAE authorities configured separately for each emirate at the provincial level.

United Kingdom

We reduced VAT from 20% to 5% on children's meals, tickets, and family attractions for the United Kingdom, Northern Ireland, and Isle of Man authorities, effective from June 25 through September 1, 2026, following Statutory Instrument No. 576/2026.

GLOBAL UPDATES

Global Product Group

As part of our ongoing development of the Global Product Group (GPG), we created 3241 new commodities covering the categories of beverages.

In addition, our GPG products will be supported with Product Category Attributes (PCA). PCAs allow clients to use an alternative commodity code reference to activate global content. GPG products may be referred to by clients either by a mapped Product Code (configured as a Standard Mapping), through a direct reference to that GPG product's commodity code, or by using the PCA commodity code. At this time, PCAs are being added only for GPG products that are directly related to an existing US Commodity Code. These PCAs will be displayed on GPG products as UNSPSC attributes.

Future releases will continue to expand our global offering by adding additional content. Please watch for release notes throughout 2026 and beyond.

Canada and Mexico

As GPG continues to evolve, this content is still being developed and will be expanded in upcoming releases, including additional coverage for beverages, food and supplements, medical supplies, oils, and hazardous products.

NOTIFICATIONS

Botswana

We are monitoring the legislative process related to the proposed amendments to the Value Added Tax Act 2025, including the introduction of VAT on digital services and the associated registration obligations for foreign suppliers. We will implement the required changes once the legislation is formally enacted.

Brazil

The Tax Research team at Thomson Reuters has been continuously monitoring the extensions of tax incentives across the various Brazilian states. In certain cases, although State Legislative Assemblies ratify ICMS Agreements and express their support for the extensions, the effective implementation of such measures depends on the issuance of a formal act by the respective State Executive Branch. Nonetheless, the team remains closely monitoring regulatory developments across all federative units, which are expected to intensify throughout the tax reform transition process.

We are making available an updated list of tax codes and qualifiers for federal withholding tax content named “Brazil Withholding Qualifier and Tax Code Guide List”, which can be viewed at the following link: [Brazil Tax Content Documentation](#).

The IBS-City template is temporarily unavailable due to an update; it will be available in Q3 2026.

Looking ahead for 2027, we have successfully established the authorities and rate structures for IBS-City, and the associated rules are scheduled for delivery in upcoming releases.

Brazil Tax Reform

The Tax Reform in Brazil was approved originally through the Proposal of Amendment to the Constitution (PEC 45/2019), resulting in the Constitutional Amendment 132/2023. The approval of the tax reform represents a monumental change in the Brazilian Indirect Tax System, concluding an internal debate that spanned several decades.

The issuance of Complementary Law 214/25 remains almost in total consistent with the original Proposal of Complementary Law 68/24 (PLP). This Complementary Law establishes the foundation for the new taxes, and it also introduces regulations regarding reduced tax rates, specific tax regimes for several sectors, and some methods of tax payment, among other provisions.

The tax changes proposed in EC 132/23 and with Complementary Law aims consolidate five current federal and state taxes (PIS, COFINS, IPI, ICMS and ISS) into the following categories:

- a) Social Contribution on Goods and Services (CBS) – Under the jurisdiction of the Federal Government, this consolidates the following taxes: PIS, COFINS, and IPI.
- b) Selective Tax (IS) – Under the jurisdiction of the Federal Government, this replaces the IPI and applies exclusively to products that are harmful to health and the environment.
- c) Tax on Goods and Services (IBS) – Under the jurisdiction of the States and Municipalities Governments, this consolidates the following taxes: ICMS and ISS.

Complementary Law No. 227/2026 introduces key measures for the implementation of the new consumption tax framework, including the establishment of the IBS Management Committee (CG-IBS/CGIBS); rules governing IBS tax administration and administrative tax proceedings; guidelines for the distribution of IBS revenues; operational integration between the CBS and the Federal Revenue Service; transition rules for the phase-out of ICMS and ISS; and provisions applicable to special zones and differentiated tax regimes.

Building on this framework, Decree No. 12,955/2026, operationalizes the CBS by detailing its scope of taxation, non-cumulative credit system, split-payment mechanics, and new electronic invoicing and compliance requirements, while key elements of the reform remain pending, such as the full operational regulation of the IBS, final tax rates, portions of the transition rules, sector-specific applications, and the final integration model among tax authorities and payment platforms. Complementing this, Resolution No. 06/2026, issued by the IBS Management Committee (CGIBS), advances the practical implementation of IBS by setting common operational rules applicable to both CBS and IBS.

In ONESOURCE Determination Enterprise Cloud we have already uploaded some elements as described below:

- Authorities of CBS/IBS/IS (ZR/NT taxes)
- Full Rates CBS/IBS
- Reduced Rates for CBS/IBS
- New Rules to support CBS/IBS product taxability
- Updates in CST codes applicable for CBS/IBS (standard codes)
- NBS Codes
- cClasstrib Codes

We prepared a document ONESOURCE Indirect Tax Determination Brazil Tax Reform FAQ with frequently asked questions about tax reform, which can be viewed at the following link: [Brazil Tax Content Documentation](#).

We prepared a guide with clear instructions on how our ONESOURCE Determination Enterprise is addressing Brazil's Tax Reform in 2026/2027, covering the new taxes CBS (federal) and IBS (state/municipal). The document outlines applicable rules, rates/fees, details of new calculation methods, and some examples, which can be viewed at the following link: [Brazil Tax Content Documentation](#).

In addition, we updated the PIS and COFINS rules and set an end date of December 31, 2026.

The authority Brazil IS (Selective Tax) was created with the standard rates ZR and NL, and an effective start date of January 1, 2027. The calculation logic applicable to this authority is currently under engine development to be delivered in Q3/2026. The rules corresponding to this authority will be created at a future stage, following the applicable legal definitions.

We will continue to monitor future legislation and provide updates as additional guidance is issued.

Brazil Tax Reform – Registration Mask

Under the current NF-e model, taxpayer identification relies on cadastral validations of the CNPJ at the national level and IE at the state level, and documents may be rejected when the State Registration is missing, invalid, or not in good standing.

In the context of the BR tax reform, Complementary Law No. 214/2025 introduces a mandatory national identification framework for IBS and CBS. As of January 1, 2027, CBS federal-level validations will continue to operate as they do today. For IBS determination, however, transactions submitted to ONESOURCE Determination Cloud without the recipient's State Registration, when applicable, will not trigger IBS authority calls and therefore will not result in IBS calculation. This behavior reflects the taxpayer identification requirements established under the tax reform legislation that we have so far and represents expected product behavior.

To support a smooth transition to the new tax model and help avoid unintended disruptions in IBS determination, customers are encouraged to proactively review their master data and system integrations to ensure that the recipient's State Registration is provided whenever required.

Looking ahead to the next transition year (2027), we will share further updates soon.

Denmark

We are monitoring the legislative process for changes proposed in the 2026 Budget. The newly formed government has re-introduced several initiatives from the 2026 Budget agreement that lapsed at the election, including the abolition of VAT on books, which is currently expected to take effect from 2027 — rather than the originally intended date of July 1, 2026. We will implement these changes once the relevant legislation is enacted.

Egypt

The Ministry of Finance announced a second package of tax facilitation measures, which is expected to include VAT measures supporting investment and the healthcare sector. We are monitoring developments and will implement VAT changes once the relevant legislation is enacted.

Estonia

We will update the standard rate of 24% to reflect the indefinite end date in one of the upcoming content updates.

Kazakhstan

We are monitoring the legislative process for Order No. 281/NK which introduces a VAT exemption on the import of IT products retrospectively from January 1, 2026, through January 1, 2029. We will implement the changes once the official law is published.

Philippines

We are monitoring proposals for a VAT reduction or suspension on fuels. We will implement VAT changes once the official law is enacted.

Portugal

We are monitoring the legislative process for the proposed Law No. 47/XVII/1.1, which introduces a temporary VAT reduction on residential construction and rehabilitation. We will implement the changes once the law is enacted.

Saint Lucia

We are monitoring government updates on the upcoming 2026/2027 budget to determine whether the temporary zero-rated VAT measures on essential food items and selected building materials will be extended.

Sri Lanka

The Inland Revenue Department issued Notice SEC/PN/VAT/202602 dated March 31, 2026, postponing the implementation of the standard 18% VAT on digital services supplied by non-resident providers until July 1, 2026. We will introduce this change in one of the upcoming content updates.
