The Domestic Reverse Charge authority has been created to support the sale of some of the specific products listed in Article 46 of the Danish VAT Act. This authority has not been created to support any services that might be covered by the domestic reverse charge rules. Therefore, in order to trigger the right tax result, these operations need to be passed under the transaction type of "goods".

The reverse charge for this type of authority is triggered by the authority option "ER - Establishment Required". Therefore, in order to trigger the Domestic Reverse Charge authority it is necessary to set the establishment of the buyer in the ship from location to "yes".
