

ONESOURCE™ RETRY TOOL FOR SAP GLOBAL NEXT

PRODUCT VERSION 1.0

Document Version 1

VERSION 1.0

This document provides the following information:

- [Release Summary](#)
- [User Configuration Instructions](#)

RELEASE SUMMARY

The Global Next Retry Tool is designed to automatically retry a tax call between Global Next and ONESOURCE DETERMINATION to prevent and/or minimize tax calculations errors, due to potential network instability or connectivity issues.

The Retry Tool supports all Global Next modules and is limited up to a maximum of 2000 line items.

Note: The Retry Tool is supported with Global Next versions of **6.4.4.0 and higher**.

CONFIGURATION INSTRUCTIONS

Once the transport of the [Retry Tool](#) is installed, please follow the below steps to configure it.

1. From the Global Next menu, go to **Customer Setup and Extensions> Configuration Tables> General Configuration Values** or transaction **/IDT/GEN_CONFIG_VALS**.
