Introduction

Welcome to ONESOURCE Indirect Tax Integration for SAP Global Next for Brazil.

This guide provides delta updates for Global Next customers already connected to ONESOURCE Indirect Tax for Brazil. It focuses only on the changes required in the existing Global Next–ONESOURCE integration to support Brazil's tax reform. As Thomson Reuters continues testing and aligning solutions with evolving mandates, updates will be issued as addendums. Thomson Reuters DFE and SEFAZ integrations are not covered here.

About ONESOURCE Indirect Tax Integration for SAP

Accurate, global indirect tax calculation with monthly content for 175+ countries, including Brazil.

Deep SAP ECC/S/4HANA integration minimizes manual decisions and eliminates frequent SAP tax code changes.

Audit-ready data supporting reporting and returns.

Built and maintained in SAP: data collector and tax interface using SAP SOAP to Determination, G/L write-back, configurable field mapping, and in-SAP logs for analysis and troubleshooting.

Audience

If you are responsible for overseeing setting up ONESOURCE Indirect Tax Integration for SAP, you will need to coordinate help from the following people:

- SAP Business Systems Analyst
- SAP Configuration Consultant
- SAP Technical Resource (ABAP Programmer)
- SAP Security Contact
- Tax Professional

Make this guide available to each of these contributors to ensure you have a successful installation.

Prerequisites

For a seamless and successful deployment of Integration for SAP we highly recommend that you follow the instructions in the guides listed below in order:

- Configuration Guide for ONESOURCE Tables
- Configuration for SAP Tables
- Installation and Programmers' Information
- Installation Instructions (User Guide)
- Special Functions

When working on Integration for SAP you must have knowledge of the SAP tax features, covering all aspects of FI, MM, and SD and have spent time either as an expert configurator or consultant in these areas. Because the setting up of tax integration with ONESOURCE Indirect Tax also includes technical work in the ABAP Workbench, such as data dictionary changes and ABAP coding, you must be able to understand and interpret these changes as well. We recommend that you assemble a team to implement this product because it requires both functional and technical input. Your team should include someone who understands business requirements and processes, as well as someone who can implement the required software changes.

Please take the following into account before setting up the Integration for SAP:

- This guide assumes a fresh installation of Integration for SAP. Customers who are upgrading from a prior 5.x version of Integration should contact Thomson Reuters Indirect Tax.
- The minimum SAP system version must be ECC 6.0, EHP 6. Please see tested platforms by Thomson Reuters in Platform Information section.
- Procure a subscription to ONESOURCE Indirect Tax Determination
- It is assumed that the persons who install, configure, and use the tax interface in SAP have some basic understanding of the overall ONESOURCE Indirect Tax Suite of products and how they interact with each other.

Resources

The following table describes which resources are available:

RESOURCE	DESCRIPTION
Customer Support	Look for answers in the Knowledge Base or open a support ticket.
Installation Instructions (User Guide)	This guide provides an overview of the architecture and business processes as they relate to Sales and Use tax, as well as VAT scenarios in FI, SD, and MM. The target audiences are the Business Systems Analysts, Consultants, and Tax Professionals who set up the tax processes in SAP.
Installation and Programmers Guide	<p>This guide instructs you how to install the Integration for SAP. The target audiences are the Basis personnel who will process the application of the transports to the SAP system and the ABAP programmers who will perform the required INCLUDE statements within the user exits and other coding blocks. There is also discussion in this manual for the ABAP programmer regarding customization logic and how custom additions to the programs should be added to the system if needed in the future.</p> <p>This guide describes the supported combinations of operating systems, databases, and application servers/web containers.</p> <p>Refer to support lifecycle for SAP for the end-of-life dates for ONESOURCE Indirect Tax Integrations for SAP.</p> <p>Consult this guide to see which combinations of software Thomson Reuters tests with Integrations.</p>
Configuration Guide SAP tables	This guide instructs you how to configure and set up SAP tables and processes to enable tax calculations to meet your unique requirements.
Configuration Guide ONESOURCE tables	This guide instructs you how to configure and set up ONESOURCE Indirect Tax tables and processes to enable tax calculations to meet your unique requirements.
Configuration Guide for Special Functions	This guide instructs you how to configure and set up SAP and Integration tables and processes to enable tax calculations to meet your unique requirements for special functions within SAP, including Plants Abroad, Cash Discounts, Deferred Taxes, Service Entry Sheets, Settlement Management, and Tax-only invoices.
Vendor Charged Tax (VCT) Guide	<p>This guide describes the functionality for integrating Indirect Tax Enterprise Cloud VCT calculations with SAP Global Next transactions.</p> <p>This functionality is for the United States and Canada only</p>

Support Protocol

The ONESOURCE Indirect Tax Integration for SAP is built, maintained, and owned by Thomson Reuters. We follow SAP best practices, development standards, and strive to minimize the impact this solution will have on your SAP environment. With any 3rd party Add-On in SAP, the vendor providing the solution is responsible for support of that Add-On. In the case of an issue with the ONESOURCE Indirect Tax Integration for SAP please follow these simple steps to open a support ticket with Thomson Reuters:

1. Identify the potential issue and gather all necessary facts (log files, scenarios, configurations, screen prints).
2. Provide system environment information such as your SAP Version (ECC or S/4 HANA), EHP/ SP or FPS level, as well as the Integration version.
3. Another month later, you imported your March source file. The March source file contains both the January and February transactions, in addition to the March transactions. Again, ONESOURCE Tax Information Reporting needs to know that the January and February transactions were included.
4. Open a support ticket with Indirect Tax

Quick view of features

FEATURES	TIMELINE
Full Rate determination for CBS & IBS (for SD and MM processes)	This SAP Note outlines the delivery and support strategy for the Brazil Tax Reform solution. It also provides a list of related OSS released to address the Brazilian Tax Reform.
Support for CST and cClastrib Determination for IBS & CBS	Information is covered within this document. However, we have provided guidance using standard SAP Determination. See Section Localization: Define Tax Situation for CBS & IBS)
IBS Municipal	This document covers all relevant information. In addition, we've provided interim guidance using a custom authority, as the standard authority is still under review.
FI Financial Postings – CBS & IBS Determination	This document includes comprehensive details. It also offers guidance on how to optionally post CBS and IBS values to the accounting system.
Reduced Rate requirements	This document outlines the necessary information. We've included instructions for updating the WSDL and creating custom mappings, although these elements remain under review.
Deferrals and Suspensions Requirements	Currently under review
Support for CST and cClastrib Determination for IBS & CBS	Currently under review

SAP OSS NOTES

Brazil Tax Reform Leading Note

- Customers can follow this SAP leading note to implement the changes in their system and to stay informed about the latest changes related to the upcoming Brazil tax reform.
- **This leading note outlines the recommended SAP Notes that should be applied as baseline prerequisites to support the Global Next Brazil Tax Reform solution.** These notes address critical system updates required to accommodate the new tax regulations introduced by the Brazilian government, including the CBS (Contribution on Goods and Services), IBS (Tax on Goods and Services).
- These SAP Notes are essential for ensuring system readiness and compliance with the upcoming Brazil Tax Reform.

Customers are strongly encouraged to review and implement them as part of their baseline configuration.

OSS	SUMMARY
<u>3561376 - Tax Reform Leading SAP Note - SAP for Me</u>	This SAP Note outlines the delivery and support strategy for the Brazil Tax Reform solution. It also provides a list of related OSS released to address the Brazilian Tax Reform.

ONESOURCE INDIRECT TAX DETERMINATION CONFIGURATION

New CBS and IBS Authority Types

- As part of the latest ONESOURCE IDT update, new authority types for CBS (Contribution on Goods and Services) and IBS (Tax on Goods and Services) have been introduced. These additions support enhanced tax configuration and compliance capabilities aligned with Brazil's upcoming tax reform.

CBS Authority Type:

Localization: Define Tax Situation for CBS and IBS

Note: While Global Next Integration Engineering team is working to integrate the CST for the tax response to determine the tax law for CBS and IBS, customers can use SAP provided configurations.

Define tax situations for CBS (contribution on goods and services) and IBS (tax on goods and services). You can read, edit, delete, and create new records for CBS and IBS.

T-CODE	PATH
J_1BTAX_SITN	Financial Accounting → Financial Accounting Global Settings → Tax on Sales/Purchases → Basic Settings → Brazil → Define Tax Situation for CBS and IBS

Create new entries as follows:

Localization: Assign CBS and IBS Tax Situation to Order Type and Item Category

In this customizing activity, you assign Sales Order type and Item Category to the tax situations for CBS (contribution on goods and services) and IBS (tax on goods and services).

T-CODE	PATH
J1BTAX	Nota Fiscal → SD Billing → SD Item Category

A new field created under J_1BSDICA table so that customers can assign CBS and IBS tax situation to the combination of sales order and item categories:

Localization: Set Tax Type as Statistical for Specific Scenarios

This Customizing activity allows you to designate CBS and IBS tax types as statistical within a specific scenario, defined by the combination of the NF type and its corresponding item type.

TABLE	PATH
J_1BDF_STAT_TAXV	Financial Accounting → Financial Accounting Global Settings → Tax on Sales/Purchases → Basic Settings → Brazil → Set Tax Type as Statistical for Specific Scenarios

These settings allow customers to ensure that CBS and IBS amounts are treated as statistical and therefore excluded from the Nota Fiscal total calculations. This path is applied for incoming and outgoing NFs:

GLOBAL NEXT CONFIGURATION INSTRUCTIONS

Determine Condition Type for Taxes

This configuration path in ONSOURCE Indirect Tax (IDT) is used to define and manage condition types for tax determination. The /IDT/DETER_COND_TYPE view enables customers to specify which condition types should be considered during tax calculation processes, ensuring accurate mapping between SAP pricing procedures and ONSOURCE tax logic.

To enable proper tax determination for CBS (Contribution on Goods and Services), create new entries that associate the CBS authority type with the appropriate condition types within the configuration view

T-CODE	PATH
/IDT/DETER_COND_TYPE	ONESOURCE Indirect Tax → Customer Setup and Extensions → Basic Setup at Install → /IDT/DETER_COND_TYPE

GLOBAL NEXT TECHNICAL INSTRUCTIONS

Update WSDL

Update the WSDL to include new properties introduced by the Brazilian tax reform. This update enables the use of the `effective_rate` and `rate_reduction` fields in field mapping.

For further details, refer to the ONESOURCE Indirect Tax Integration for SAP Installation and Programmer's Guide corresponding to your product version.
