Introduction

Welcome to ONESOURCE Indirect Tax Integration for SAP Global Next for Brazil.

This guide provides delta updates for Global Next customers already connected to ONESOURCE Indirect Tax for Brazil. It focuses only on the changes required in the existing Global Next-ONESOURCE integration to support Brazil's tax reform. As Thomson Reuters continues testing and aligning solutions with evolving mandates, updates will be issued as addendums. Thomson Reuters DFe and SEFAZ integrations are not covered here.

About ONESOURCE Indirect Tax Integration for SAP

Accurate, global indirect tax calculation with monthly content for 175+ countries, including Brazil.

Deep SAP ECC/S/4HANA integration that minimizes manual decisions and eliminates frequent SAP tax code changes.

Audit-ready data supporting reporting and returns.

Built and maintained in SAP: data collector and tax interface using SAP SOAP to Determination, G/L write-back, configurable field mapping, and in-SAP logs for analysis and troubleshooting.

Audience

If you are responsible for overseeing setting up ONESOURCE Indirect Tax Integration for SAP, you will need to coordinate help from the following people:

- SAP Business Systems Analyst
- SAP Configuration Consultant
- SAP Technical Resource (ABAP Programmer)
- SAP Security Contact
- Tax Professional

Make this guide available to each of these contributors to ensure you have a successful installation.

Prerequisites

For a seamless and successful deployment of Integration for SAP we highly recommend that you follow the instructions in the guides listed below in order:

- Configuration Guide for ONESOURCE Tables
- Configuration for SAP Tables
- Installation and Programmers Information
- Installation Instructions (User Guide)
- Special Functions

When working on Integration for SAP you must have knowledge of the SAP tax features, covering all aspects of FI, MM, and SD and have spent time either as an expert configurator or consultant in these areas. Because the setup of tax integration with ONESOURCE Indirect Tax also includes technical work in the ABAP Workbench, such as data dictionary changes and ABAP coding, you must be able to understand and interpret these changes as well. We recommend that you assemble a team to implement this product because it requires both functional and technical input. Your team should include someone who understands business requirements and processes, as well as someone who can implement the required software changes.

Please take the following into account before setting up the Integration for SAP:

- This guide assumes a fresh installation of Integration for SAP. Customers who are upgrading from a prior 5.x version of Integration should contact Thomson Reuters Indirect Tax.
- Minimum SAP system version must be ECC 6.0, EHP 6. Please see tested platforms by Thomson Reuters in Platform Information section.
- Procure a subscription to ONESOURCE Indirect Tax Determination
- It is assumed that the persons who install, configure, and use the tax interface in SAP have some basic understanding of the overall ONESOURCE Indirect Tax Suite of products and how they interact with each other.

Resources

The following table describes which resources are available:

RESOURCE	DESCRIPTION
Customer Support	Look for answers in the Knowledge Base, or open a support ticket.
Installation Instructions (User Guide)	This guide provides an overview of the architecture and business processes as they relate to Sales and Use tax, as well as VAT scenarios in FI, SD, and MM. The target audiences are the Business Systems Analysts, Consultants, and Tax Professionals who set up the tax processes in SAP.
Installation and Programmers Guide	<p>This guide instructs you how to install the Integration for SAP. The target audiences are the Basis personnel who will process the application of the transports to the SAP system and the ABAP programmers who will perform the required INCLUDE statements within the user exits and other coding blocks. There is also discussion in this manual for the ABAP programmer regarding customization logic and how custom additions to the programs should be added to the system if needed in the future.</p> <p>This guide describes the supported combinations of operating systems, databases, and application servers/web containers.</p> <p>Refer to support lifecycle for SAP for the end-of-life dates for ONESOURCE Indirect Tax Integrations for SAP.</p> <p>Consult this guide to see which combinations of software Thomson Reuters tests with Integrations.</p>
Configuration Guide SAP tables	This guide instructs you how to configure and set up SAP tables and processes to enable tax calculations to meet your unique requirements.
Configuration Guide ONESOURCE tables	This guide instructs you how to configure and set up ONESOURCE Indirect Tax tables and processes to enable tax calculations to meet your unique requirements.
Configuration Guide for Special Functions	This guide instructs you how to configure and set up SAP and Integration tables and processes to enable tax calculations to meet your unique requirements for special functions within SAP, including Plants Abroad, Cash Discounts, Deferred Taxes, Service Entry Sheets, Settlement Management, and Tax-only invoices.
Vendor Charged Tax (VCT) Guide	<p>This guide describes functionality for integrating Indirect Tax Enterprise Cloud VCT calculations with SAP Global Next transactions.</p> <p>This functionality is for the United States and Canada only</p>

Support Protocol

The ONESOURCE Indirect Tax Integration for SAP is built, maintained, and owned by Thomson Reuters. We follow SAP best practices, development standards, and strive to minimize the impact this solution will have on your SAP environment. With any 3rd party Add-On in SAP, the vendor providing the solution is responsible for support of that Add-On. In the case of an issue with the ONESOURCE Indirect Tax Integration for SAP please follow these simple steps to open a support ticket with Thomson Reuters:

1. Identify the potential issue and gather all necessary facts (log files, scenarios, configurations, screen prints).
2. Provide system environment information such as your SAP Version (ECC or S/4 HANA), EHP/ SP or FPS level, as well as the Integration version.
3. Another month later, you imported your March source file. The March source file contains both the January and February transactions, in addition to the March transactions. Again, ONESOURCE Tax Information Reporting needs to know that the January and February transactions were included.
4. Open a support ticket with Indirect Tax

Create standard sales order.

A standard sales order for Brazilian plant and customer created:

The screenshot shows the SAP Display Standard Order BR 7732: Overview screen. The top header displays the title and a SAP logo. The main area is divided into several sections: Sales, Item Overview, Item detail, Ordering party, Procurement, Shipping, and Reason for rejection. The Sales section contains fields for Standard Order BR (7732), Net Value (10.000,00 BRL), Sold-to Party (7001), Auto Services Ltd, 1234, rio de Janeiro - RJ, 20000-000, Brazil, Ship-to Party (7001), Auto Services Ltd, 1234, rio de Janeiro - RJ, 20000-000, Brazil, Cust. Reference (TESTLB-101), and Cust. Ref. Date. The Item Overview section shows a single item: Item 10S-1200, Material 10S-1200, Req. Segment, Order Quantity 10 EA, Unit of Measure (Un) EA, and a checked checkbox for OneSource Material for Brazil. The Shipping section includes fields for Deliver.Plant, Total Weight (10 KG), Volume (0.000), and Pricing Date (07/23/2025). The bottom of the screen shows a toolbar with various icons for navigating and managing the order.

CBS and IBS were calculated under conditions ZCB1 and ZHS:
