VERSION 2.0.3.2

UPDATE SUMMARY

ONESOURCE Global Tax SAP Ariba solution 2.0.3.2 is a maintenance release to fix a defect on OSGTA 2.0.3.1

.FUNCTIONAL CHANGES

WRONG TAX JURISDICTION CODE

Issue: The One Source Global Tax for Ariba 2.0.3.2 ERP posting call generates a wrong tax jurisdiction code when Ariba Source system request contains a full City name instead of the three-digit ISO name of the city. This leads to inability of Ariba to integrate the reconciled invoice into SAP ERP or other ERP's.

Solution: Debug OSGTA 2.0.3.1 integration to process all Ariba source system requests successfully and send correct tax jurisdiction codes irrespective of the type of City name received.
