## VERSION 2.6.0.7

### UPDATE SUMMARY

Thomson Reuters is pleased to provide a fix version of **ONESOURCE Integration for Oracle Fusion Tax** on top of the 2.6.0.6 release. The 2.6.0.7 version supports the following enhancement:

### AUTOMATED CONTENT UPLOAD

**New Enhancement:** The Automatic Content Upload feature is designed to streamline and automate the distribution of content across multiple global regions, including the USA, Canada, EMEA (Europe, the Middle East, and Africa), AEM (Asia Emerging Markets), LATAM (Latin America) and India. By subscribing to this feature, customers can ensure that new content is efficiently and accurately delivered to the appropriate regional platforms, enhancing consistency and reducing manual workload.

### ENHANCED SECURITY UPDATES

All applications have been updated to remediate the critical and high-severity vulnerabilities identified during our Snyk scans. This ensures our systems are now better protected against known security threats and potential exploits.

### ZERO TAX LINES ARE GETTING MARKED WITH SELF ASSESSED TAX FLAG

**Issue:** All The Zero tax lines are marked as Self Assessed Tax Flag on the Payables invoices.

**Solution:** Code is fixed in the integration logic and now Self Assessed Tax flag is not populated for the invoices with zero tax lines.
