VERSION 2.5.0.0

UPDATE SUMMARY

Thomson Reuters is pleased to provide a new version of **ONESOURCE Integration for Oracle Fusion Tax** on top of the 2.3.4.0 release. The 2.5.0.0 version supports the following enhancements and bug fixes:

Support for Legacy Content Types

ONESOURCE Integration for Oracle fusion V2 now will support all content types like Modern Summarization, Default and Override. This change was specifically made to enable our V1 customers to transition to V2 version seamlessly. All the company configurations, ERP configurations, Dynamic Mappings and Tolerances will be migrated automatically from V1 to V2 when the customer opts for this. We request customers to raise a support ticket for this migration at our [support central](#)

Note: The current Oracle fusion integration for V1 will be decommissioned by 31-Oct-2023. All customers are requested use the next 6 months timeframe to complete this migration.

AR Synchronization extract

From 2.5.0.0 of ONESOURCE Integration for Oracle Fusion does not need a **CUSTOM** AR Sync extract. The integration will start honoring Oracle's seeded extract. Please revert to oracle seeded Synchronization extract.

Support for Brazil

ONESOURCE Integration for Oracle Fusion now has content to support Brazil's FDG (Fiscal Document Generation) for AR and FDC (Fiscal Document Capture) for AP. Please download the latest content for the ONESOURCE customer center

Note: Support for Brazil was earlier released to customers as part of V2.4.0.0 to OCI platform. This release now extends it for customers in AWS platform too.

Content

ONESOURCE Integration for Oracle Fusion now supports download of both R2R content and workbook for US, Canada, India, EMEA, LATAM and APAC from Integration UI. The download supports both full content and monthly patches. Please refer to documentation for the details.

AP Tax Only Invoices

ONESOURCE Integration for Oracle Fusion now supports TAX only for AP. Please refer to our configuration guide for more details
