# ONESOURCE GLOBAL TRADE

## The First Truly Global Solution For Global Trade Management

Built with world-class technology and backed by leading industry experts, **ONESOURCE Global Trade** simplifies the entire global trade management process by automating routine tasks and opening up the opportunity for global trade professionals to focus on value-added activities. Your company can achieve a new level of accuracy, compliance and efficiency that saves you time and costs with the first truly global solution of this kind.

ONESOURCE Global Trade offers a comprehensive set of software solutions for operating, controlling and managing several foreign trade modules: Import, Export, as well as the control and management of special customs programs. Thomson Reuters has more than 1200 clients from different industries, such as: automotive, aeronautical, telecommunications, IT, electronics, building, commodities, trading, foreign trade, agribusiness, chemicals, pharmaceutical, health, oil and gas, among others.

### HIGHLIGHTS

- Users stay connected with all stakeholders throughout the process while managing several foreign trade modules
- Easily integrates with leading ERPs, including certified links with Oracle, SAP and others
- Our Certified Implementer Program partners (including the Big 4) helps you to enable the full operation of all import and export processes
- Accesses data from all business units in a single global instance
- End-to-end visibility and integrations among customers using our solutions in different countries
- Removes complications in implementing cost-saving special programs and free trade agreements

### INTENDED FOR

- Importers & exporters
- Multinational global supply chains

### FEATURES

**Rapid Global Deployment** — ONESOURCE Global Trade is a truly localized solution whereby in-country subject matter experts design the local product to reflect the country-specific regulations, language and business needs, allowing quick deployment without extensive customization or local content sourcing.

**Automatic updates** — Regulatory changes are automatically updated and reflected in the solution so users minimise risk and stay aware and confident throughout the global trade process.

**Special Programs** — ONESOURCE Global Trade covers common special programs, such as:

- Foreign Trade Zone
- Duty Drawback
- Special Tariff Provisions (9801, 9802)
- Bonded Warehouse

**Free Trade Agreements (FTAs)** — Integrated software and content solution allowing companies to determine whether the goods that they produce are subject to regulation/criteria/rules or eligible for preferential treatment and duty rates under FTAs.

**Restricted Party Screening (RPS)** — A solution fully integrated with the company's corporate system (ERP), allowing the validation of business partners (customers and suppliers), backed by the Accelus™ World Check database.

## BENEFITS

The result is a more efficient, seamless trade process that improves your performance, increases margins and manages risk and compliance:

- **Improves performance** by configuring workflows to speed up the clearance of goods, sharing tools to connect as quickly as possible with brokers, and integrating internal systems such as your ERP.
- **Increases margins** by reducing logistics costs and through improved calculations of tax and tariff liabilities; and equipping trade offices with the right research for new trade programs, be it a new duty rate exemption, FTZ incentive, or regulatory requirement; and providing highly intelligent classification and valuation engines.
- **Better manages risk and compliance** by streamlining internal reporting information requirements with statutory requirements across sites and countries, as well as providing quick and accurate information access to ensure visibility and predictability of operations for the entire trade process.

Through these capabilities, Thomson Reuters **ONESOURCE Global Trade** enables your teams to enact new trade programs and enter new markets—all in a comprehensive solution delivering total efficiency and user confidence.
