Zawya Projects

Your Guide to Opportunities in Middle East Projects

Zawya Projects is an online B2B platform providing in-depth monitoring of major construction projects in the MENA that will give professionals a competitive edge to effectively conduct business by providing relevant, valuable and engaging online intelligence

Project Monitor

The Projects Monitor tracks over 2,700+ major projects in the Middle East covering the complete project life-cycle from planning, commissioning, execution and completion.

Key Contacts

Find the right contacts. All listed projects offer telephone and email contacts of key project personnel from owners, developers, consultants and contractors.

Project Overviews

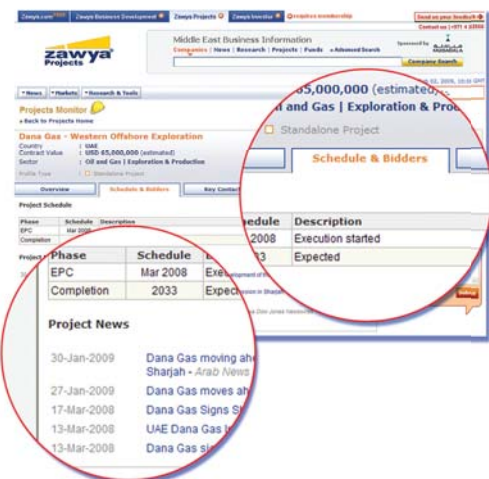

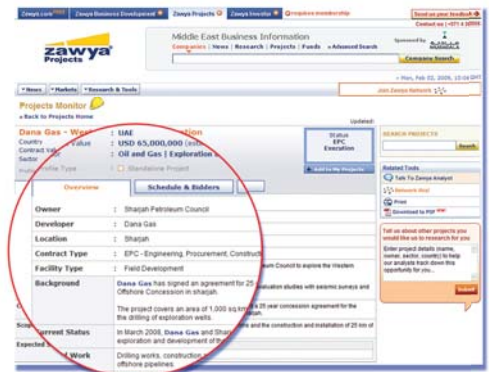

Determine what upcoming or ongoing projects suit your strategy and match your capacity with concise project overviews. Allocate your time and resources wisely by evaluating the competitive landscape that surrounds potential bids, with details on background initiative, scope of work, current status, key participants and financing information.

Schedule & Bidders

Prepare in advance, gain insights on who you're up against, and evaluate your success rate of winning a project with access to detailed schedules, including lists of pre-qualified, bidding and awarded contractors and developers.

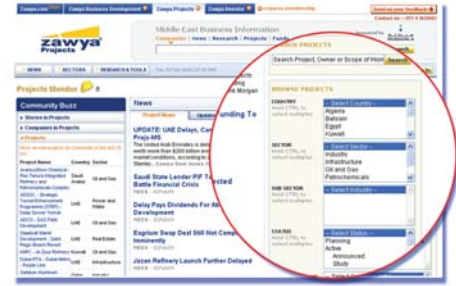

Project News

Stay on top of the latest industry developments with comprehensive projects related news and announcements from trusted regional and international sources focusing in the Middle East.

Projects Search

Look up individual projects and build your own list of opportunities using a range of criteria that includes country, sector, status, value and much more.

Download to Excel

Create customized lists of projects by building, saving and downloading projects details.

Corporate Monitor

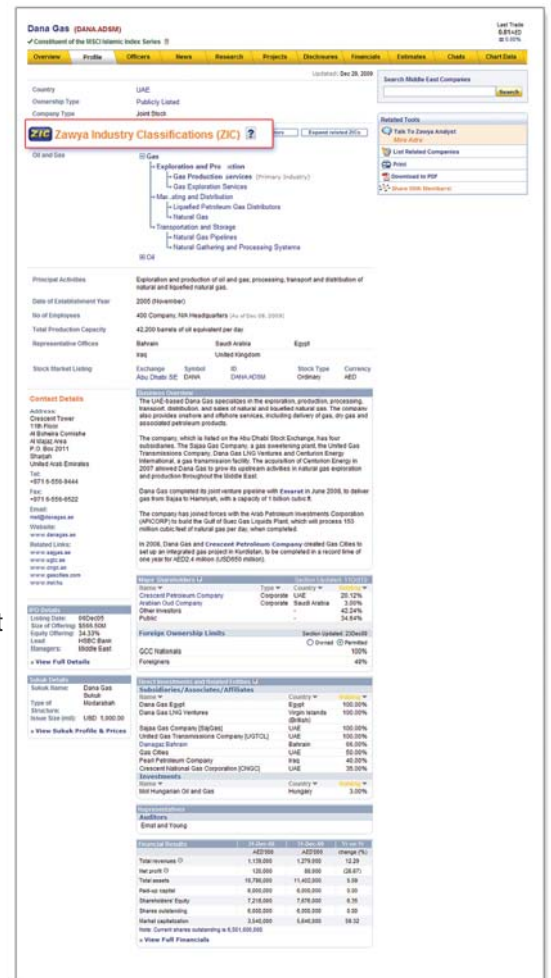

The Corporate Monitor profiles the top 15,000 companies in the Middle East, researched and monitored by our in-house team of 30+ company analysts.

The names and positions of over 110,000 board members, senior officers, and managers of the top companies in the Middle East are listed in the Corporate Monitor service as well.

Zawya Industry Classification (ZIC)

Filter companies based on sector and up to five sub-industries to help you conduct your search effectively and generate lists tailored to your target markets.

You can even determine which regional companies are Shariah compliant by utilizing Zawya's Shariah-screening filters.

The Corporate Monitor includes:

- Over 110,000 senior officers for 15,000+ companies in the Middle East
- Major shareholders, subsidiaries, and related entities
- Company contact details
- Business overviews and operations
- Related news
- Key competitors
- Build Company List (BCL):** create customized company lists by building, saving and downloading companies contact and details.

Research Monitor

The Projects Monitor tracks over 2,700+ major projects in the Middle East valued at USD3.7 Trillion, covering the complete project life-cycle from planning, commissioning, execution and completion.

Stock Market Research:

Gain fresh forecasting perspectives on the Middle East's equity markets with broker research, notes and commentaries from over 50 investment houses.

Sector/Industry Research:

Strengthen your understanding on specific sectors in the region with in- depth analysis aggregated from third party research providers. Zawya's own team of analysts also prepare in-depth studies on specific industries that include a complete synopsis of the sector, along with company rankings and significant developments.

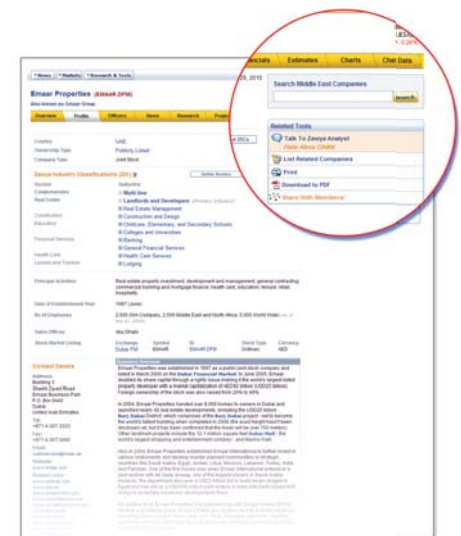

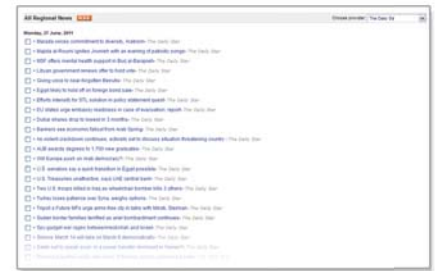

Macroeconomic/Country Research:

Reports prepared by third party research providers such as the **Economist Intelligence Unit (EIU)** offer country outlooks, risk summaries and built-in industry forecasts, enabling you to gain a clear top-down view of the macro-economic picture in the Middle East.

SATORP - Jubail Refinery and Petrochemical Complex

Also Known As : **Jubail Export Refinery**

Country : **Saudi Arabia**

Project Value : **USD 10,000,000,000** Estimated

Sector : **Oil and Gas | Refinery Petrochemicals | Olefins & Aromatics**

Consultant : Technip Saudi Arabia (FEED)

Contractor : Contracting and Construction Enterprises (Construction - Basic Infrastructure)

Profile Type : Master Project

Associated Projects : Contract Package (14) | Related Projects (1)

Overview | **Schedule & Bidders** | **Key Contacts**

Owner : Saudi Aramco Total Refining and - Saudi Petrochemical Company Arabia

Shareholders : Saudi Arabian Oil Company - Saudi Arabia - 62.50 %
Total - France - 37.50 %

Location : Jubail Industrial City 2, Jubail, Al Sharqiyah , Saudi Arabia

Contract Type : EPC - Engineering, Procurement, Construction

Payment Terms : Lump Sum Turnkey (LSTK)

Facility Type : Export refinery

Capacity : 700,000 ty of paraxylene
140,000 ty of benzene
1.5 million ty of ethylene
500,000 ty of propylene

Background
Saudi Aramco Total Refinery and Petrochemical Company (SATORP) plans to build a refinery to produce gasoline, low-sulfur diesel and naphtha in Jubail Industrial City 2, Saudi Arabia.

The plants will process heavy crude to produce 700,000 ty of paraxylene, 140,000 ty of benzene and 200,000 ty of polymer grade propylene.

The project is divided into 15 packages and includes construction of distillation and hydrotreating facilities, a conversion unit , a sulphur and amine saltwater treatment unit, an aromatics plant and a coker unit.

The output will supply the demand for transportation fuels and petrochemicals in Europe, Asia and the Middle East.

Technip is the FEED study consultant.

Expected Events	Schedule	Contract Phase/Phase	Description
	2013	Completion	Commercial operations expected to start

Latest Events
In April 2011, construction of the major packages was in progress.
In 2013, commercial operations are expected to start (delayed from Q3 2012).

Previous Events
In August 2010, construction of the distillation and hydrotreating facilities, the conversion unit and the coker unit started.
In Q3 2009, detailed engineering started on major packages.
On 7 July 2009, SATORP signed the 13 EPC contracts awards.
On 17 June 2009, 10 EPC contracts were awarded. Along with the major packages, the general building works package (package 7) was awarded to Oasis Contracting Company and the telecommunication system package (package 10) was awarded to Sumitomo Corporation.
In Q1 2009, SATORP revised the project costs and decided to reduce the cost of the project to less than USD 10 billion.
In January 2009, the infrastructure contract for the temporary facilities at the construction site was awarded to Abdul Rahman M. Al Shalawi Est.
In December 2008, the USD 93.3 million basic infrastructure contract was awarded to Contracting and Construction Enterprise.
On 22 June 2008, Saudi Aramco and Total signed the shareholders agreement in order to form Saudi Aramco Total Refinery and Petrochemical Company (SATORP).
In May 2008, the project was granted final approval from the Saudi Oil Ministry after it faced delays due to several reasons such as the increase of EPC costs and the lack of labor work force.
In August 2006, Technip was appointed to conduct the FEED and EIA studies, prepare financing and marketing studies, capital operating cost estimates and bid packages, and provide procurement support.
In May 2006, Saudi Aramco and Total signed the MoU to develop the project.

Scope of Work
Construction of a refinery including installation of:
- Main feed cracker
