Addressing Systemic Bias More Directly and Forcefully

The problems of racism and bias in American society are longstanding and run deep, dating back to our history of slavery, and the legal profession sits squarely in that history, but we are not bound by past practices and beliefs. Let this time embolden all of us to renew our efforts to address more directly and more forcefully systemic bias and prejudice in the legal profession, and in particular the many ways that the profession has failed Black lawyers and the Black community.
