9:10am –10:25am Promise & Possibility: The State of the M&A Market

Amid the gradual decline of M&A activity from its 2021 frenetic pace, early returns for 2023 imply muted but no less lucrative possibilities for impactful middle market transactions. For all the concern over macroeconomic uncertainty and geopolitical tumult, robust private equity dry powder and renewed interest in key sectors such as automobiles, manufacturing, and technology augur a selective and more strategic path forward for savvy deals professionals. This opening conversation explores the shifting realities of the US middle market amid protracted change. How content are corporate development and deals professionals to wait out the economic downturn? What regulatory developments bear scrutiny under the newly installed 118th United States Congress? Will an elevated risk environment yield more creative and complex provisions or earnouts? Please join us as a distinguished panel of deals professionals addresses these and other key topics.

Patience & Fortitude: The Market Moves of Private Equity
Recent reports suggest that private equity (PE) firms will drive approximately 30% to 40% of global deal flow in 2023. Yet with higher interest rates and growing market saturation hindering momentum, the outlook for a solid year to come may ultimately fall short of expectations. This year’s private equity roundtable examines the tantalizing potentiality and attendant risk facing an evolving sector. Pressure to navigate near-term uncertainty alongside a greater focus on market differentiation are just some of the top concerns facing firms today. How are private equity leaders managing risk—and leading enterprise change—in the current climate?

Indispensable Assets: Understanding Issues of Human Capital in a Deal
Effective due diligence should include an in-depth analysis of a company’s human capital. However, understanding how to create synergies between a seller’s existing HR policies and compensation plans and any predetermined, buyer mandated human capital requests can be complex, especially given the mercurial nature of employment and labor regulations today. This session explores how to address key issues and considerations in HR due diligence. Our faculty will explore areas such as salary structures, executive compensation, equity audits, and unwritten buyer practices throughout the deal process.

Risky Business: Navigating Global Sanctions and ESG Risk in Middle Market Deals
Between unprecedented global sanctions and the continued ascent of ESG issues in deal making, the current deals landscape continues to offer several not insignificant challenges for the US middle market. For Western companies exiting Russia, understanding complex U.S. U.K. or EU regulations—on top of retaliatory Russian-imposed controls—can be a harrowing hill to climb. Similarly, with increased calls for transparency around corporate governance, supply chains, sustainability, and climate risk, the progress of even the most innocuous deal could legitimately be derailed. This
presentation offers the latest guidance for buyers and sellers within regulated industries. How can corporate legal and deals professionals anticipate or avoid potential pitfalls in a rapidly evolving environment? What strategies can help mitigate risk throughout the deals process?
